## Building Map

Defined by BUILDING_MAP_TABLE at \$1DA6
The first 8 data elements are for 8 buildings. The last four are repeats of the 1 st. Their element structure is:
Offset Description
$0,1 \quad$ Pointer to the beginning of the building map
2 Color of building map
3 \$00

The building data is converted to a character value in the SHOW_BLDG_MAP_TILE routine found at \$1D64 using this equation:

Character value $=(($ BuildingMapData $* 2) \& 0 x 06)-8$
Therefore $00=-8(\$ F 8), 01=-6(\$ F A), 02=-4(\$ F C)$, and $03=-2(\$ F E)$ (see the tables below).

Building 1 \& 5
Color of building map is $\$ 14$. This is the 2nd character set with palette color 4. Pointer to beginning of the building map is $\$ 1 D C 6$ (note 1st value is at the bottom and the last is the top):

## Building 2 \& 6

Color of building map is $\$ 1 \mathrm{C}$. This is the 2 nd character set with palette color C. Pointer to beginning of the building map is $\$ 1 \mathrm{DDF}$ (note 1st value is at the bottom and the last is the top):

## Building 3 \& 7

Color of building map is $\$ 14$. This is the 2nd character set with palette color 4. Pointer to beginning of the building map is $\$ 1$ DF8 (note 1st value is at the bottom and the last is the top):

## Building 4 \& 8

Color of building map is $\$ 1 \mathrm{C}$. This is the 2nd character set with palette color C. Pointer to beginning of the building map is $\$ 1 \mathrm{E} 11$ (note 1 st value is at the bottom and the last is the top):
.db \$00, \$03, \$00, \$03, \$03, \$03, \$03, \$00
